# How do I use the Kaltura Video Editor?

The Kaltura Video Editor is an online editing tool you can use to edit videos you have captured or uploaded with Kaltura My Media

Follow these steps to edit a video --
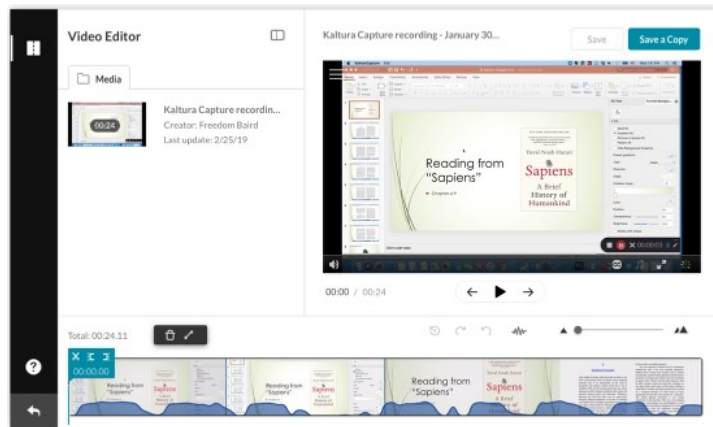

Open the video in My Media

Under the video click the "ACTIONS" tab and choose "Launch Editor"

NOTE: be sure to choose "Launch Editor" rather than "Edit"

"Edit" will let you to edit information about the video, whereas "Launch Editor" will let you edit the video itself.

The Kaltura Video Editor will open

Use the Play button to play and pause the video. Use the left and right arrows to jump to the beginning or end of the video

The Real Time Marker shows where you are in the video's timeline

Click and drag the Zoom slider to zoom into or out of parts of the timeline

Click the Audio icon to select an audio track (if you have more than one)

Click the Undo and Redo icons to undo and redo edits

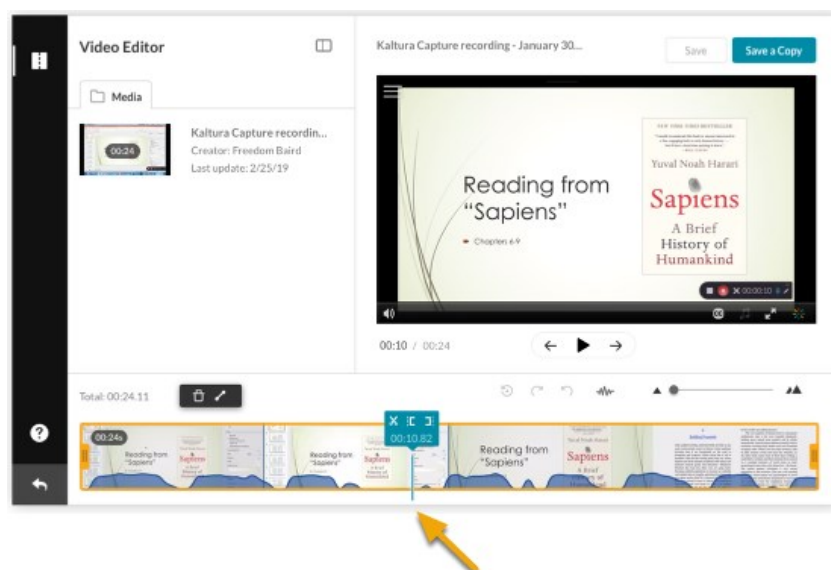

Click the Reset icon to undo all edits and revert to the original video

How do I trim footage from the beginning and end of a video?

Open a video in the Kaltura Video Editor and follow these steps to remove footage from the beginning and end of a video --

## Move the Real Time Marker to where you would like the new beginning of the video to be

If needed, use the Zoom slider to zoom into or out of parts of the timeline, for more precise placement of the Real Time Marker

Click the "[" icon to mark the new in-point for the video

Move the Real Time Marker to where you would like the new end of the video to be

Click the "]" icon to mark the new out-point for the video

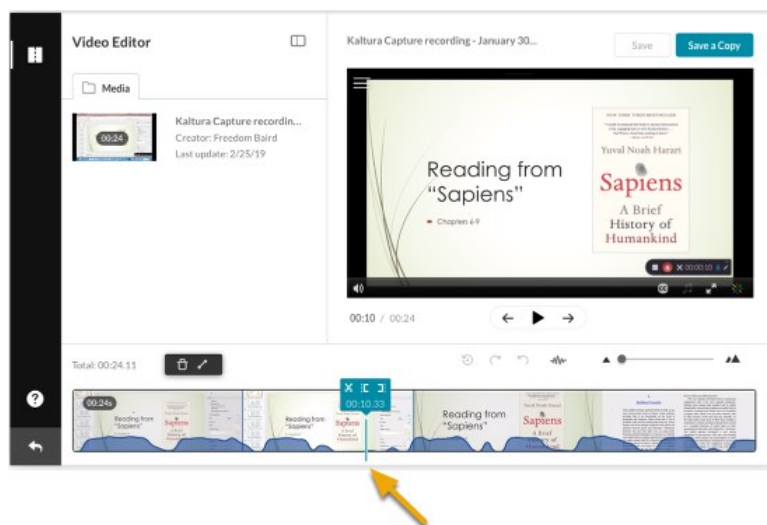

The video will now be highlighted in yellow with the new in-points and out-points

How do I remove footage from within a video?

Open a video in the Kaltura Video Editor and follow these steps to remove footage from the middle of a video --

**Move the Real Time Marker to the "in-point" of the footage you would like to remove**

If needed, use the Zoom slider to zoom into or out of parts of the timeline, for more precise placement of the Real Time Marker
## Click the Scissors icon to create a "split" at that in-point

Move the Real Time Marker to the "out-point" of the footage you would like to remove

Click the Scissors icon again to place a "split" at that out-point

Click on the section of video you would like to remove to insure that it's highlighted in yellow

Press "Delete" on your keyboard to delete that section of video. It will no longer be shown in the timeline.

**Repeat the steps above to remove other sections of video as needed.**

If needed, you can use the Undo and Redo buttons to undo or redo edits

You can also use the Reset icon to cancel all edits and return to the original version of the video

When you have finished removing sections of footage, click "Save a Copy" to save the edited copy of the video

Enter a title and click "Create". The edited video will then be available in Kaltura My Media
